

# Hierarchical Safety Cases

Ewen Denney, Ganesh Pai and \*Iain Whiteside  
SGT / NASA Ames Research Center, USA  
\*University of Edinburgh, Scotland

# What we're addressing

## Novelty: First to

- Provide a formal foundation
- Demonstrate the automation capabilities with our toolset, AdvoCATE

## So what?

- Safety cases are increasingly required by regulators in the US and worldwide
- Real safety cases are non trivial, large, difficult to comprehend and analyze

There's a need for complexity management.  
Hierarchy is one way forward.

Come and See What It's All About !

NFM 2013 Poster Session  
Wednesday May 15, 5:00 – 6:00PM
